

TWIN-GUIDE CYLINDER

Handling

⚠ Caution

① Please control the cylinder within the allowable speed range:

If the cylinder is not using the speed control valve, it may occur beyond the speed range of the piston. If it is used outside the allowable speed range, it will cause cylinder damage or reduce product life. Therefore, please install the speed control valve and adjust the speed within the allowable range. The product allowable speed is shown in Table 1.

② Please note the speed control during vertical installation:

When the cylinder is used vertically, if the load rate is large, it will cause the speed control valve to exceed the upper limit and could cause sudden unintended acceleration which will affect the product life. Therefore, it is recommended to use a dual speed controller.

③ The lateral load of the cylinder during the operation must be within the allowable range:

Exceeding the allowable value will prevent the cylinder from operating properly and affect the life of the product.

④ Do not scratch the mounting surface of the cylinder body and end plate to avoid affecting the flatness:

If the flatness of the mounting surface is poor, the cylinder will malfunction. The mounting surface of the cylinder body and the end plate should have a flatness of less than 0.05 mm.

⑤ Do not cause surface damage or impact marks on the operating parts of the piston rod and the guide rod:

Damage to the appearance will result in damage to the seal ring which could cause leakage or malfunction of the cylinder.

Caution for safety
(Read before installing)

Order example

MCGB – 03 – 12 – 50 – G

MODEL

TUBE I.D. STROKE

PURPOSE / TYPE OF BEARING

Code	Purpose / Type of bearing
03	Stop / Slide bush
23	Push / Linear bearing (Could attach a table for the use as a lifter)

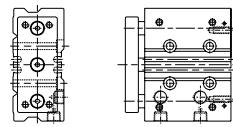

PORT THREAD

Blank: M5×0.8
(for ø12, ø16)
Blank: Rc thread
G: G thread
NPT: NPT thread
(for ø20~ø32)

Features

- Proven track record in manufacturing precision guided cylinders.
- Multi-Ports as standard enabling two direction mounting option.
- Flush fitting sensors.
- Inbuilt high density rubber pad absorbs energy at the end of stroke.
- Magnetic as standard.

Specification

Model	MCGB	
Model		
Acting type	Double acting	
Tube I.D. (mm)	12,16	20,25,32
Port size	M5×0.8	Rc1/8
Medium	Air	
Operating pressure range	0.1~1 MPa	
Proof pressure	1.5 MPa	
Ambient temperature	-5~+60°C (No freezing)	
Cushion	With rubber cushion pad	
Available speed range	50~500 mm/sec	
Lubrication	Not required	
Sensor switch (*)	RCE  , RCE1  , RDEP 	

Installation of sensor switch

Table for standard stroke

Series variety (Bearing type)	Tube I.D.	Stroke (mm)												
		10	20	25	30	40	50	75	100	125	150	175	200	
MCGB-03 (Slide bush)	ø12													
	ø16													
	ø20													
	ø25													
	ø32*													
MCGB-23 (Linear bearing)	ø12													
	ø16													
	ø20													
	ø25													
	ø32													

* 1. MCGB-03 Tube I.D.ø32: 25mm for the shortest standard stroke.

*2. Please contact us if the stroke is out of specification.

Capacity graph

Capacity for the use as a stopper

Linear bearing type is not available as a stopper.

Stop capacity

MCGB-03...30st

Stop capacity

MCGB-03...30st

For the use of attaching a plate to the link bar, choose a bore size referring to the formula below.

$$W = W' \times \frac{L}{\ell}$$

Coefficients for conversion

MCGB series	$\phi 12$	$\phi 16$	$\phi 20$	$\phi 25$	$\phi 32$
ℓ	40	42	42	42	44

W: The maximum weight of the work carrier in the above graph for the stopper's capacity.

Capacity for the use as a lifter

Allowable eccentricity load for the use as a lifter (at supply pressure 0.5 MPa)

Show the dynamic allowable value at L(mm) eccentricity from the center of the guide rod.

Slide bush

MCGB-03...10-50st

Slide bush

MCGB-03...75-200st

Linear bearing

MCGB-23...10-50st

Linear bearing

MCGB-23...75-200st

Capacity table

Allowable lateral load

Unit: N

Shows the dynamic allowable value, when actuating the cylinder with lateral load W at the guide rods' top (vertical load against the guide rods).

Tube I.D.	Bearing type	Stroke (mm)											
		10	20	25	30	40	50	75	100	125	150	175	200
