

# 180° ROTATION GRIPPER

Compatible with Various Grippers

**S** MCHS 2-Finger

**J** MCHJ 3-Finger

**G** MCHG2 3-Finger

**MCRT-S series**

**MCRT-J series**

**MCRT-G series**

## Features

### Hollow Shaft Design

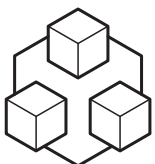

Hollow shaft design for easy sensor wiring.

### Various Grippers

Can be used with various grippers (2, 3-Finger), allowing customers to choose freely

### Bottom Air Supply

Hose-free direct connection : Air supply tunnel can connect directly without piping to assure the flexible when rotating.

### Function Integration

Modular rotation and gripping system for automation applications.

### Splash-Proof Design

More suitable for machining (cutter fluid) environments, improving issues caused by fluid leakage.

### Magnetic as Standard

Can be used with embedded sensors.
